### DETAILED ACTION

1. This Office Action is in response to the application filed May 17, 2000. Claims 1-40 are presented for examination.
2. On November 04, 2003, the Examiner called Applicant's representative, Mr. David Graham, to advise Applicant of the below restriction/election requirement. Applicant, however, did not make an election responsive to this telephone call.

#### *Election/Restrictions*

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 drawn to *card insertion*, classified in class 709, subclass 301.
  - II. Claims 10-13 and 20-23 drawn to *input/output command process*, classified in class 710, subclass 5.
  - III. Claims 14-19 drawn to *interrupt processing*, classified in class 710, subclass 260.
  - IV. Claims 24-40 drawn to *software updating*, classified in class 717, subclass 168.
4. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as *card insertion*, whereas invention II has separate utility such as *input/output command process*, invention I has separate utility such as *card insertion*, whereas invention II has separate utility such as *input/output command process*, invention III has separate utility such as *interrupt processing*, whereas invention IV has separate utility such as *software updating*. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, or IV restriction for examination purposes as indicated is proper.
